## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

The finality of the 6-8-2006 rejection is hereby withdrawn. A new rejection using art which was not previously relied upon follows.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3,5,8 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Ishigure et al (2001/0024617).

Ishigure et al disclose a system with a drive unit (motor M), a control unit 37, which control the drive unit and a supply unit (as contained by rotor housing 12). The drive unit, controller and supply unit are all cooled by a common coolant, with the controller controlling the flow of the coolant as well as the functioning of the motor M. In regard to claim 15, a pump as disclosed by Ishigure et al is seen as usable as a compressor as the discharge is at a higher pressure than the inlet.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ishigure et al.

Ishigure et al disclose applicants' basic inventive concept, a device for circulating a fluid with a controller, a drive unit and a supply unit all being cooled by a common coolant and the controller controlling the drive unit to control the flow from the supply unit, substantially as claimed with the exception of specifying if liquid or gas coolant is used. Official Notice is taken that both gas and liquid coolants are well known in the cooling art and either could be controlled by the system of Ishigure et al. It would have been obvious to one of ordinary skill in the art at the time of applicants' invention to use either a gas or liquid coolant in the coolant control system of Ishigure to provide the required cooling for the system to ensure proper functioning and long life fro the components.

***Allowable Subject Matter***

Claims 13,14,16-27,29,31-39 and 41 are allowed.

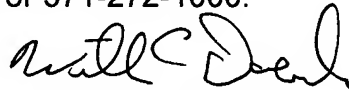

Claim 40 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
